Literacy & Governance

Sociologists & Policy makers note that:
- literacy increases quality of life, job opportunities and access to higher education.

Governments and Policy makers:
- place a high premium on literacy and a lot of public funds go into providing basic, secondary & higher education in most countries.

Literacy rate is a crucial measure to enhance a nation's human capital because literate people are less expensive to govern, generally have a higher socio-economic status and enjoy better health and employment prospects. Countries with high literacy rates rank higher on the Human Development Indices.
Education – Why Bother Try?

- If you think Education is expensive try the cost of ignorance!

- Funding – Inadequacy, wrong deployments/priorities
- Weak governance mechanisms – poor accountability & low transparency;
- Weak Monitoring & evaluation
Challenges

- Out dated curricula - Gap between Universities, Industries & labour
- Limited space and access – an alarming 1:8
- Shut downs & lock outs – unending strike actions by Unions;
- Absence of a unified university academic calendar;

Once Upon a Time!

• A blind boy sat on the steps of a building with a hat by his feet. He held up a sign which said: “I am blind, please help me”. There were only a few coins in the Hat.

• A man was walking by. He took a few coins from his pocket and dropped them into the Hat. He then took the sign, turned it around and wrote some words. He then put the sign back so that everyone who walked by would see the new words. Soon the Hat began to fill up. A lot more people were giving money to the Blind boy.
Once Upon a Time!

• That afternoon the man who had changed the sign came to see how things were. The boy recognized the footsteps and asked, “were you the one who changed my sign in the morning? What did you write?” The man said, “I only wrote the truth. I said what you said but in a different way. I wrote, “Today is a beautiful day but I cannot see it”."
Moral of the Story

• Both signs told people that the boy was blind. But the first sign simply said the boy was blind. The second sign told people they were so lucky they were not blind. Should we be surprised that the second sign was effective?
Moral of the Story:

Be thankful for what you have, Be innovative, be creative. Think differently and positively. When life gives you 1000 reasons to sigh, show life you have 1000 reasons to smile. Face the past without regrets; face the present with confidence and future with faith. One of the most beautiful things in life is to see a person smiling and even more beautiful is to know that You are the reason behind it!!!!!!!!
Limits

• Your limit - ! It is limitless with caution, tact, diplomacy & discretion, & respect for the law and rights of others!

• When this curtain of your service at UNAAB comes down, may History be kind to you.

Thank You
